

KEEP OUR PLANET GREEN

STÂNEAN LIANA OANA

PROF. LB. ENGLEZA ŞC GIM NR. 1 AGHIREŞ

To keep our planet green for the next generations is a very good motto . Let's see how we can do this thing . It is for us and for our children . Don't throw the garbage anywhere: streets , forest , roads , lakes , rivers . There are special places for this . Let's Keep our environment clean . Let's talk to every one who do these bad things and make them to be conscious of the worst things they do . Try to give good signals to our colleagues , family , relatives , friends and to all people we know or don't know directly.

The beauty of nature means all –beautiffulness of our body and souls . To have a beautiful , a good soul you need to see good things around you –to see good people and a nice and especially a clean environment .

All over the world people are talking about ‘ green planet ‘ but few of them are doing something . Don't pollute oceans and seas - the rare species will disappear .

We won't survive without them .

In your country there won't be any touristic area if you don't green the places .

Don't hunt the animals that clean forest by eating the dead bodies . Don't throw chemicals in the rivers .

Put the plastic in the right places .

Don't use too much electricity or water if you don't need it .

To keep the planet green you need to be real conscious about that and explain the others the importance of doing all this things .

GO GREEN!
